Data & Analytics: Power BI, DAX

Concepts: REST APIs, Authentication, Database Design, Software Testing

Languages: English (Fluent), Spanish (Fluent)

Projects

Acadian Store - Local Online Marketplace

Tech Stack: HTML • CSS • JavaScript • PHP • MYSQL • Laravel 10

- Collaborated with 2 teammates to develop a full-stack online marketplace for local buyers and sellers
- Built seller dashboard tools to manage inventory, pricing, and order updates
- Designed admin features for user support, return handling, and community rule enforcement
- Contributed to responsive UI design and implemented a secure account system with an organized database structure

Education

Thaddeus Stevens College of Technology — Lancaster, PA

Computer Software Engineering Technology — Expected May 2026

Coursework includes software engineering, data analysis, programming fundamentals, databases, and systems development. Completed projects involving dashboard creation, dataset cleaning, and calculated measures for reporting.

Work Experience

Amazon Warehouse

Learning Ambassador — April 2021 - Present

- Assisted 20+ shift issues, improving workflow efficiency and reducing errors
- Trained and onboarded 50+ new associates, ensuring consistent compliance with Amazon SOPs
- Partnered with managers and process assistants to track performance metrics

Mary's Daycare Center, LLC

Software Engineering Intern — January 2026 - Present

- Coordinated tasks among peer interns, providing technical guidance and code review
- Creating and managing Power BI Dashboards
- Performing minor data-related tasks (organization, entry, or analysis)
- Assisting with website design, updates, and maintenance
